

Automatic

Powerman 5000

The trip is on for the million miles
93 to the sun
So take your place and you say goodbye
It's automatic, you're the one It's automatic, it's automatic
It's automatic, you're the one
It's automatic, it's automatic
Your day alive has just begun What's in the air, who's in your mind?
Where's the light in your eye?
Within the realm of the possible
It's no big surprise, surprise It's automatic, it's automatic
It's automatic, you're the one
It's automatic, it's automatic
Your day alive has just begun Brilliant sheep lead to brilliant babies
A thousand stars, a million maybes
Captivating the captivated
Save the souls of those that you created It's automatic, it's automatic
It's automatic, you're the one
It's automatic, it's automatic
Your day alive has just begun, alright It's automatic, it's automatic
It's automatic, you're the one
It's automatic, it's automatic
Your day alive has just begun It's automatic, it's automatic
It's automatic, you're the one
It's automatic, it's automatic
Your day alive has just begun
