

Listen Now

The Knife

Listen now, I am afraid of everything
When you told me I was special
It was the happiest moment for a long, long time Listen now, I keep forgetting your name
When you laid down on the kitchen floor
It was the happiest moment for a long, long time We seek new seed new
Some revolutionary
And you will never get a hold
We seek and we will find
Reason to stay alive
The price has never been this low Listen now, I was afraid of everything
Then I straightened my head up
It was the happiest moment for a long, long time
