

It's Over

Mest

You've been waiting for, you never knew for sure
Cuz time was going by and never asked you why
And when I talk to you, the words they went right through
Your head

But I couldn't tell you were under her spell
She had full control, no one would ever know
How much she didn't care
just like Sonny and not Share

The beat didn't go on

She looked at you and she said to your face
Its over its over
She's got a new man and it's time for u to move over move over
you're drunk and now u wish that u were sober were sober
cuz now u cant get it out of your head
That its over, that its over, that its over

She said she doesnt know
its like a springer show
she says that she loves you
but that she loves him too
so you keep holding on
your love for her is strong
till she says so long and u did nothing wrong
but this keeps happenin
time and time again
youre thinking to yourself she was your only friend
but your so fucking wrong
and your so fucking lame
you realize theyre all the same

She looked at you and she said to your face
Its over its over
She's got a new man and it's time for u to move over move over
you're drunk and now u wish that u were sober were sober
cuz now u cant get it out of your head
That its over, that its over, that its over

cuz its over its over its over
and its over its over its over

Tell them lies and they will believe you
when ur honest they will decieve you
if u love them they will just leave you
but if u play them they will stay with you

Tell them likes and they will believe you
when ur honest they will decieve you
if you love them they will just leave you
but if you play them they will be with you

and ill be here when she says

She looked at you and she said to your face
Its over its over
She's got a new man and it's time for u to move over move over
you're drunk and now u wish that u were sober were sober
cuz now u cant get it out of your head
That its over, that its over, that its over

its over its over its over
she said im sorry its over
its over its over its over
she said im sorry its over
its over its over its over
she said im sorry its over
