# Hallucinations

## David Usher

Breathe, hallucinations start to fade
All the colors are back to gray
I never understood these things I hatedBut now, as we all disappear
The world becomes quiet clearly
Something I can live in
If I could just get throughTonight, the poison's in my head
And I can't feel my legs
I'm not feeling anythingI'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deepI'm standing at the top looking down
Thought it'd be so damn easy
I thought it would be easierWait, hallucinations back in place
I said I'd call if I can't face
Another day of normal
That's what they gave meBut now the telephone's on fire
And I can't seem to dial
Even though I know
You're there to save my soulTonight, the poison's in my head
And I can't feel my legs
I'm not feeling anything
Cannot feelI'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deepStepping off the top, feel the wind
Underneath my feet
Standing at the top looking down
Float in outer space, there's no soundTonight, the poison's in my head
And I can't feel my legs
I'm not feeling anythingI'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deepStepping off the top, feel the wind
Underneath my feet
Standing at the top looking down
Float in outer space, there's no sound
I feel alive, I feel alive, I feel alive
