

Hallucinations

David Usher

Breathe, hallucinations start to fade
All the colors are back to gray
I never understood these things I hated But now, as we all disappear
The world becomes quiet clearly
Something I can live in
If I could just get through Tonight, the poison's in my head
And I can't feel my legs
I'm not feeling anything I'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deep I'm standing at the top looking down
Thought it'd be so damn easy
I thought it would be easier Wait, hallucinations back in place
I said I'd call if I can't face
Another day of normal
That's what they gave me But now the telephone's on fire
And I can't seem to dial
Even though I know
You're there to save my soul Tonight, the poison's in my head
And I can't feel my legs
I'm not feeling anything
Cannot feel I'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deep Stepping off the top, feel the wind
Underneath my feet
Standing at the top looking down
Float in outer space, there's no sound Tonight, the poison's in my head
And I can't feel my legs
I'm not feeling anything I'm standing at the top looking down
Thought I'd be so free
Float in outer space, take a breath
Don't you breathe too deep Stepping off the top, feel the wind
Underneath my feet
Standing at the top looking down
Float in outer space, there's no sound
I feel alive, I feel alive, I feel alive
