Hallucinations

David Usher

Breathe, hallucinations start to fade

All the colors are back to gray

I never understood these things I hatedBut now, as we all disappear

The world becomes quiet clearly

Something I can live in

If I could just get throughTonight, the poison's in my head

And I can't feel my legs

I'm not feeling anythingI'm standing at the top looking down

Thought I'd be so free

Float in outer space, take a breath

Don't you breathe too deepI'm standing at the top looking down

Thought it'd be so damn easy

I thought it would be easierWait, hallucinations back in place

I said I'd call if I can't face

Another day of normal

That's what they gave meBut now the telephone's on fire

And I can't seem to dial

Even though I know

You're there to save my soulTonight, the poison's in my head

And I can't feel my legs

I'm not feeling anything

Cannot feelI'm standing at the top looking down

Thought I'd be so free

Float in outer space, take a breath

Don't you breathe too deepStepping off the top, feel the wind

Underneath my feet

Standing at the top looking down

Float in outer space, there's no soundTonight, the poison's in my head

And I can't feel my legs

I'm not feeling anythingI'm standing at the top looking down

Thought I'd be so free

Float in outer space, take a breath

Don't you breathe too deepStepping off the top, feel the wind

Underneath my feet

Standing at the top looking down

Float in outer space, there's no sound

I feel alive, I feel alive, I feel alive
