## **Torture**

## **Kmfdm**

My motivations unresolved

Things are just never what they seem

Apathy's currencies deceit

Pitch bending radiated dreamsThe jackal's wishing well forgotten

Dark cloud sunrise

The view of someone somewhere else is

Burnt in my eyesHow long dug up remains

How low the rotting fame

How low to see right through

Low long the hole I knewHow low the clear eyed stain

How long to set aflame

How low to be set up

How long and taken out The ant-like karma from the crack in a hand

Full painting on a mural in a foreign landfill

Mind controlled by the pulley of the strings

So remote the view from the puppetry swing setMy reservations have evolved

Scenes once negated ushered in

Mercy killing one to one defend

The visionary criminals descend

On knees all burningA term of useless lifeless thought

What a paid ride

Alchemic jail cell vivisection

Text subject day jobHow long to pacify

How low you still deny

How low from up above

How low the tripping soundHow long to kick back down

How long the creeping crown

How low the holy cheat

How long the leap of faithThese revelations undermined

Controlled belief in leads mankind

Each penny sold and mesmerized

We're stoned, two fold reversal beckoning The binding crayon words inverted

Injustice travestiaHow long dug up remains

How low the rotting fame

How low to see right through

How long the hole I knewHow low the clear eyed stain

How long to set aflame

How low to be set up

How long and taken outWe worship acid moans and curbside holidays

## Recycle shit we throw away in glossy packaged craze Maybe in a day or so I'll stumble on that grassy knoll

To set the record straight

Announcing to myself, wake up, wake upWe kill everything that's not tied down We euthanize but keep alive the lowest form of prison life

So useful and experimental

Treatment of the sick and dyingWhat about the torture?

What about the torture?

What about the torture?

What about the torture?
