

I'm Through (EP Version)

Guster

I looked down and I didn't know what to think
Vapor trails from the engine of this plane
Shut my eyes and I flew right from this place
Made a wish and I blew it all away
Then I was alone
Then I was alone Right now the sun fills up the sky
And waves of color beat in time
Tell all my friends I'm seeing them again
I'm on a great divide
There is no doubt, I'm never coming back
The story of my life I was down and I did not understand
Was afraid couldn't wash it off my hands
So I rose and I flew right from that place
Got my wish that I'll never be the same
Then I was alone
Then I was alone Right now the sun fills up the sky
And waves of color beat in time
Tell all my friends I'm seeing them again
I'm on a great divide
There is no doubt, I'm never coming back
The story of my life
Now I'm fine I'm through
I'm through
I'm through Then I was alone
Then I was alone
But it won't be long
But it won't be long I'm through
I'm through
I'm through
