

Instinct

Iggy Pop

Standing on the borderline
Between joy and reason
Tending carefully, my fire
Waiting for my season I know who these people are
I know what they stand for
Corruption's built into this plan
Nothing's under the other hand Tricks and trials
Await the child The instinct keeps me running
Running like a deer
The instinct keeps me running
Running through the grinning shadows I have seen the sludgy beach
And the poisoned river
I have met the naughty rich
They're just getting stiffer This whole place is like a maze
Or like some Medusa
Let me out, I can't accept
A second red light story Tricks and trials
Await the child The instinct keeps me running
Running like a deer
The instinct keeps me running
Running where the sun'll bless me Instinct keeps me running
Running like a moose
The instinct keeps me running
Running to keep one chance open Marks on walls, the common outlet
Tell the truth and always will
Marks on wall destroy the thought
Of perfect sunny civilization Tricks and trials
Await the child Instinct keeps me running
Running like a deer
The instinct keeps me running
Running through the grinning shadows Instinct keeps me running
Running like a bear
The instinct keeps me running
Running to keep one chance open Instinct keeps me running
Running 'cause I don't believe it
Instinct keeps me running
Running through the bare emotion Instinct keeps me running
Instinct keeps me running
Running, I'm running

Running, running, running
