Space Talk

James Ryan

Space ,taking a space walk
Still looking for love
Venus please help me
Sos planet, i need someone right now

Strange, you give me strange thoughts
Space, give me some space ,
Now that I've found you
Lets make it happen some more
We'll get so high

Slow, time moves so slowly
Slick sharp as a blade
Cutting through my life
When I'm alone
Time moves on, stretching my age

Sleek , steel sheet of water
Shine, shine shine, shine energy
Electric fingers, searing my soul
Static shock, make love to me

Taking a space walk , space talk, taking a space walk space ,taking a space walk, space talk , taking a space walk , space , taking a space walk space talk taking a space walk space , taking a space walk
Space talk, taking a space walk space
