Low Light

Pearl Jam

Clouds roll by Reeling is what they say Or is it just my way? Wind blows by low light Side tracked low light Can't see my tracks your scent way backCan I be here all alone? Clear a path to my home Blood runs dry Books and jealousy tell me wrong All I feel calm Voice blows by low light Car crash low light Can't wear my mask your first my lastVoice goes by Two birds is what they'll see Getting lost upon their way Wind rolls by, low light Eye sight, low light I need the light I'll find my way from wrong, what's real? The dream I see
