Failures

Eva Under Fire

Take all thatâ€™s left of my failures
I look back on all my failed years
Take all thatâ€™s left of my failures
All thatâ€™s left of me

I remember that September just before the leaves had turned
Stary sky that bond fire night your alarm clock radio nothing in the world could go wrong nothing in the world could bring us down who said today is different living in the moment now

So much has wrong along this road I let it go

Take all thatâ€™s left of my failures
I look back on all my failed years
Take all thatâ€™s left of my failures
All thatâ€™s left of me

Fork in the road stitch of my soul
Left in the cold on the way beaten bruised and all confused I go back to that radio nothing in the world could go wrong nothing in the world could bring us down who said today is different living in the moment now

So much has gone on along this road I let it go

Take all thatâ€™s left of my failures
I look back on all my failed years
Take all thatâ€™s left of my failures
All thatâ€™s left of me

Al thatâ€™s left, all thatâ€™s left all thatâ€™s left all thatâ€™s left

Take all thatâ€™s left of my failures
I look back on all my failed years
Take all thatâ€™s left of my failures
All thatâ€™s left of me
