

# Light From Above

## Black Tide

When the days grow darker  
And the foes are full of fear  
The light will show  
And the enemy will fall This is our downfall  
This is our crusade  
The days of struggle  
And agony must end This warfare we create  
We shall destroy  
And the light will show Light from above  
Please show yourself  
And save us all Bright you must blaze  
Your time has come  
To reign, to shine Now that things are clear again  
The battle must go on  
Sacrifice our primal thought  
So the battle must end I've been waiting way too long  
For this day has now shown  
We must fight  
It's the only way This warfare we create  
We shall destroy  
And the light will show Light from above  
Please show yourself  
And save us all Bright you must blaze  
Your time has come  
To reign, to shine Light from above  
Please show yourself  
And save us all Fight for your life  
Your time has come  
To reign, to shine Light from above  
Please show yourself  
And save us all Bright you must blaze  
Your time has come  
To reign, to shine Light from above  
Please show yourself  
And save us all Fight for your life  
Your time has come  
To reign, to shine
