

How the Gypsy Was Born

Mob Rules

Frumpy - How the Gipsy was Born
And God saw that this work was nearly done
a green, mighty planet circled round the sun.

Silver fishes increased in the blue seas
all kinds of feathered built their nests in the trees.

And God saw that everything was nice

but there had to be a creature who looked like me and you - so he realised!
So he took some earth and put it in a
form

but the oven wasn't hot enough - so the white man was born!

Walk on, walk on, you can live in the cold zone of the world

'cause you are used to it, since your birth. I have to build another creature who looks like me and you

but one who's not so pale - he has to get a hotter blow!
So he took some earth and put it in a form

but the oven was too hot now - so the black man was born!

Walk on, walk on, you can live in the hot zone of the world

'cause you are used to it, since your birth. I have to build another creature who looks like me and you

but one who's not so dark - he has to get a special blow!
So he took some earth and put it in a form

an the oven was right now - so the gipsy was born!
Go to the top of the mountain and look, do you see this land
around?

Go where you like to be 'cause you and the gipsy will be free ...
