I Don't Even Know Your Name

The Mavericks

Every time you pass me by
I sit alone and wonder why
I try so hard to catch your eye
When I don't even know your nameWith my eyes I've seen the world
But never has there been a girl
To make me fall in love this way
And I don't even know your nameIf you analyze, you will realize
That you won't have to find another
Don't you wait please don't hesitate anymoreIn my mind a thousand times
I've played the part and read my lines
You and I would be the stars
And I don't even know your nameIf you analyze, you will realize
That you won't have to find another
Don't you wait please don't hesitate anymoreIn my mind a thousand times
I've played the part and read my lines
You and I would be the stars
And I don't even know your name
