

Show Me a Sign

Modestep

This is for the ones who care
The one who isn't always there
This one's for you, now show me a sign This is for the ones who care
If you already know what has been said
This one's for you, now show me a sign Someone raise a lights up
Light up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign (put your f*ckin lights up) This is for the ones who care
This is for the ones who care
This is for the ones who care
This is for the ones who care Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign (put your f*ckin lights up) Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign (put your f*ckin lights up)
