

# Not My Year

## Suicide City

Manipulate pixels cobras biting fly's wings  
she belongs to the world cannibals infect kings  
watching my friend drown holding on to the sound  
water fills his lungs water fills

Underneath my house the children are bleeding  
outlaws in red sand are sometimes misleading  
the golden fog hanging high where the shade is  
bulimic elephants locked in cages

This is my year to break all my fear  
This is my year everyone will hear  
It's not my year it's not my year  
It's not my year to stay in the clear not my year

Ritalin will worship insomniacs with pills  
violent impact motionless robots kill  
lack of compression tumors in detention  
word of shit dying wit world of shit

Collapsing cells poison bombshells  
turning around sex is profound  
not my year

---
