Beautiful

Cavo

When everything comes back around
And leaves you lying on the ground
The pictures fade but not the face
And no one's there to take your place
Just don't be shy, go ahead and try to change
When everything in life is not so beautiful
Go ahead and rearrange
When everyone that shines is not so beautiful
They won't hold you and I can't let you go
We're saving lives in symmetry
When you come crawling back to me
But we're failing as the chemicals
Change your mind and leave you full
Just don't be shy, go ahead and try to change
When everything in life is not so beautiful

Go ahead and rearrange
When everyone that shines is not so beautiful
They won't hold you and I can't let you go
They watched you fall to pieces
Only thing that kept you hanging on this long
They tried so hard to leave you
Never cared enough to say this, someone save her
Go ahead and try to change
When everything in life is not so beautiful
Go ahead and rearrange
When everyone that shines is not so beautiful
They won't hold you and I can't let you go
Save her, someone save her
Someone save her, she's beautiful
