Three Summers Strong

Hot Water Music

i will forgive but i won't forget i will not confirm living strains we were locked we had a lot; at times we'd say we had it all three summers strong three summers gone love/hat on rooftops and everywhere down below i still care but i'm more aware-trusting gut before your word that was of worth sorry you still hurt but you've brought it all upon yourself what's there to say when it's all been said out loud why do you break yourself down and stay close to the ground stand yourself up now i'm stepping out and catching a foothold that's strong than ever who's to blame shouldn't be a care what's done is done-go from there and recuperate from past mistakes we have no choice from rise or fall strong ties are made by communication and gravity the memories of you and i are full of pain that can't be erased the struggle we couldn't hide that burned us up that turned us inside out has been closed out but not thrown away
