Grow Closer Together

The Impressions

In my hometown lived a quiet girl
Together we always seemed to be
We were just good friends
Then something deep within
My heart kept a-tellin' meBe closer together
For you might love one another
You'll be closer together
For you might love one anotherYou must take [?] to your heart
And never let her get too far apart
She's the girl that you love
She's the girl that you loveCloser together, closer together
For the first time I
Looked in to her eyes
Was a-long before I realized
Sincere and true
They said 'I love you'
And at last her heart was saying tooBe closer together
For you might love one another
You'll be closer together
For you might love one anotherYou've got to take [?] to your heart
And never let her get too far apart
She's the girl that you love
She's the girl that you loveCloser together, closer together
Come on, let's be closer together
Come on, let's be closer together
Come on, let's be closer together
Come on, let's be closer together
