

# Forever Close to You

**Brett Fuentes**

Growing up being the best we could  
Something in us keeping us strong  
With nothing left but something to hold on to  
We just make it no matter what With your loving arms holding my impossible ways  
Your tender kiss before my job out there Well all grown up  
We stand side by side  
With a light shining down on us  
And when the night falls  
We stand husband and wife  
Forever close to you When I look at you  
You take away all my doubts  
We stand together  
Until we fall With your loving arms holding my impossible ways  
Your tender kiss before my job out there And I say the love that we breathe makes us stronger in every way
