Apparitions

The Impalers

Say hello
Remain close to me
No good bye, suicide mystery
The rat in your brain
Turns a wheel connected to your guts
And all your faults are in me
And all your faults in me
What would you say if we lived on TV
Besides all the things they told you to?
And all the things they told you to
And all the things they told you to
And all the things they told you to
We're stuck inside our own machine
Apparitions, apparitions, apparitions
Say hello
Well, is it strange where you are?
Where you used to be kind of free
Are they laughing at you? Laughing at you
The rats in your brain
Rules the world from the comfort of your living room
Tell me, are we leaving soon?
The comfort of your living room
Tell me, are we leaving soon?
We're stuck inside our own machine
Apparitions, apparitions, apparitions
We're stuck inside our own machine
Apparitions, apparitions, apparitions
Na, na, na
