

End Of The World

P.o.d.

It feels like the end of the world
What happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
False prophets claim to be the answer
And misleading us and claiming your name
And you can see that all the people, they are dying
Hear the rumors of war, so blow us all away
It feels like the end of the world
And what happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
Famine in the land of your fathers
Feel the earth giving birth to the dead
In these tribulations, preach his kingdom
And this is how you know that it's the end
It feels like the end of the world
And what happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
It feels like the end of the world
And are we getting what we deserve?
So take it for what it is worth
'Cause it feels like the end of the world to me
Woah, woah, woah, woah
Woah, woah, woah, woah
Feels like the end of the world
What happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
It feels like the end of the world
Are we getting what we deserve?
So take it for what it is worth
'Cause it feels like the end of the world
It feels like the end of the world
And what happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
It feels like the end of the world

And are we getting what we deserve?
So take it for what it is worth
'Cause it feels like the end of the world
It feels like the end of the world
And what happened to peace here on earth?
It never gets better but worse
It feels like the end of the world to me
It feels like the end of the world
And are we getting what we deserve?
So take it for what it is worth
'Cause it feels like the end of the world to me
It feels like the end of the world to me
