

Ready

Alex G

On your street
In your pause between sentences
I can tell what's banging
Around
In your chore
Roll around on the kitchen floor
I know what's been getting
To you
Well you do have it tonight
(I don't know, I can't find it)
Well are you ready tonight
(I don't know, but I'll try)
She came on through me
She came right through me
She came right through me
She came right through me
All worked up
Let that clown buy our memory
A word you said meant something
To me
Chewing gum
Killing time till the morning comes
You can stay or maybe
you'll leave
Doesn't make a difference to me
She came on through me
She came right through me
She came right through me
She came right through me
