

# Look Right Through Me

## Revis

I found out, you were in a mess  
You caught me playin' songs for you  
Lipstick stains on your cigarettes  
You caught me playin' songs for you  
And it's bending my mind again Interesting how you watch the night  
And look right through me  
Facing the sky, when I ask you why  
You look right through me Climbed the fire to the hideaway  
You caught me slipping on a thought  
Practical in the things you say  
You caught me slipping on a thought  
And it's bending my mind again Interesting how you watch the night  
And look right through me  
Facing the sky, when I ask you why  
You look right through me We get lucky and turned around  
The space, you got to find yourself  
We slip up when we haven't found  
The space, you got to find yourself And it's bending my mind again  
Interesting how you watch the night  
And look right through me
