

Just The Morning

Lyle Lovett

Lie beside me
Whisper to me that you want me
Arms around me
Whisper to me that you want me There's nothing here to be afraid of
It's just the morning Stop your talking
Into the night now, don't you worry
Stop your tossing
Into the night now, don't you worry There's nothing here to be afraid of
It's just the morning It's just the morning, the coffee's almost done
You can smell it crawling in here from the kitchen
It's just the morning, falling through the window
And the floor it's always cold So if you see me
Can you tell me if I'm sleeping?
If you hear me
Can you tell me what I'm dreaming? There's nothing here to be afraid of
It's just the morning It's just the morning, the coffee's almost done
You can smell it crawling in here from the kitchen
It's just the morning, falling through the window
And the floor it's always cold So lie beside me
And whisper to me that you want me
Arms around me
Whisper to me that you know me There's nothing here to be afraid of
It's just the morning
