

Broken Promises

Survivor

Girl, is there something in the night
That draws us together
Are these moments worth the fight?
Why must we keep it to ourselves The secret we hold inside
Let me take you in my arms
With the strength of a love that's denied
And we've always believed in our heart That the chances we've missed
Still exist in the world after dark
Backstreet love affair
Running through the heart of the night Backstreet love affair
Girl, there's a tension I can taste
That speaks for the danger
Let the warnings go to waste Eyes that reflect a secret fire
That covers the fear inside
In a flash we're lost from sight
To explore the romance that we hide And the thrill of the chase plays a part
In the chances we take
We escape to the world after dark
Backstreet love affair Running through the heart of the night
Backstreet love affair
Meet me in the city tonight Backstreet love affair
Running through the heart of the night
Backstreet love affair
