Run

Ever Stays Red

You never fade the red across your wrist
There's never been a mascara that could fix
The saddest eyes a boy has ever seen
When you want so desperately to bleedWe were never meant for this
So wear it all with pride
So put your hand inside of mine
And together we'llRun until the world goes dark
And we're all alone
(Run until the world goes dark)
I swear I will
Run into the darkest night
And bring back the stars
(Run into the darkest night)
To light up your eyesYou try and hide the brusises on your skin
You are never going to hide those barried in
The coldest eyes a boy has ever felt
To hear you say that you're the one to blameWe are not the cause of this
These things were broke before
So put your hand inside of mine
And together we'llRun until the world goes dark
And we're all alone
(Run until the world goes dark)
I swear I will
Run into the darkest night
And bring back the stars
(Run into the darkest night)
To light up your eyesThese lives are not our own
This love will hold you close
And never leave your side
This world is far too cold
To go at this on your own
So place your hand in mineRun until the world goes dark
And we're all alone
(Run until the world goes dark)
I swear I will
Run into the darkest night
And bring back the stars
(Run into the darkest night)
To light up your eyes
