Crimson Thunder

HammerFall

We are the voices in the dark
Inside the fire the
Eternal Spark that will guide the wayWe are the stars up in sky
We gather winds, so you can fly
We are the light, when you're sleepingAll your dreams can come true
Where do we go?
We're just a heartbeat awayFollow the signs of the crimson thunder
We will stay by your side
Let our voices be there to guide youWe are forces in the rain
Inside your heart we are the
Unending answer to all your fearsSo take a step towards the light
The crimson sky fulfills the night
The revelation is nearAll your dreams can come true
Where do we go?
We're just a heartbeat awayFollow the signs of the crimson thunder
We will stay by your side
Let our voices be there to guide youAll your dreams can come true
Where do we go?
We're just a heartbeat awayFollow the signs of the crimson thunder
Follow the signs of the crimson thunderFollow the signs of the crimson thunder
We will stay by your side
Let our voices be there to guide youFollow the signs of the crimson thunder
We will stay by your side
Let our voices be there to guide youFollow the signs of the crimson thunder
We will stay by your side
Let our voices be there to guide you
