Now or Never

Massive

Somewhere deep inside my mind
The overzealous hard to find
The ego that is out of control
The challenge you've accepted
Overrated and neglected
Now you realize you gotta let go
Noose around my neck
And a target on my head
You know that things aren't always what they seem
They say that life's a bitch
And then you die, you wonder why
You know that nothing ever comes out for freeI said now hey, it's now or never
Looking to find the truth in lies
You know that you got nothing to lose, nothing to loseHere's a little secret
You promise you can keep it
I'm distancing myself once again
The news reports keep saying
That I'm just a little crazy
So I'm saving what I have 'til the end
They messed up the diagnosis
Under played and overwrote it
Now I'm locked up in my own prison cell
I'm scratching at the walls
And I'm making all the calls
I swear to god I'm getting out of this hellI said now hey, it's now or never
Looking to find the truth in lies
You know that you got nothing to lose, nothing to lose
