

Take A Vacation!

The Young Veins

I need to take a vacation
If this is settling down then why aren't you here?
I want a big celebration the night we get back in town
And I hope you're all there But leave the waves at the ocean, keep them all in a picture
And leave the cold where we came from
Our loneliness will keep us warm
We're going going going very far I need to take a vacation
If this is settling down then why aren't you here?
I want a big celebration the night we get back in town
And I hope you're all there Leave the past out to pasture
And take the days as they come
And leave the sand in a suitcase so we don't forget the fun
We're going going going very far I need to take a vacation
If this is settling down then why aren't you here?
I want a big celebration the night we get back in town
And I hope you're all there, and I hope you're all there
And I hope you're all there
