

Another Ugly Face

The Muffs

You watching me watching you
you're another ugly face its true
another time and another old place

I'll break your teeth and smash your face

Another joy you pass along if you will leave and carry onI want to know what you want
right by my side you pass a lot.

and if you say that I'm not real aware

just look into my eyes I'm thereanother joy you pass along if you will leave and carry ondo you think you have
a life now

do you think about me day and day and night and..
