

# Heart Beats

## Hey Marseilles

We left winter behind  
Shorter days and long nights  
Were all that was holding us back  
From people we knew we would find

Open air wears you thin  
They say you'll love again  
But love's an equation to them  
Get out what it is you put in

I will look back  
I will hold fast  
To this

(Chorus)  
Your heart beats  
For another day  
I still believe  
You love me  
But in a different way  
The night falls  
The city lay asleep  
Among the crowds  
We both know  
You're my only dream

I'm starting to see  
Where we went wrong  
The lives that we lead  
Will weave on their own  
You can't climb so high  
And still see the ground  
You're on your way up  
I'm on my way down

Looking back where we were  
There's no way to be sure  
Things could have gone other ways  
But you follow me to today  
We'll take up separate lives

And in the space that divides  
A reach for the best of what was  
And leave all that wasn't behind  
I will look back  
I will hold fast  
To this

(Chorus)

(Strings)

(Chorus)
