

Closer

[Trixie Whitley](#)

In recent days we're on a different page
It's coming to closure
I just got colder
It's been a while
Since I went away I could'nt find the words to say
Through the misted all this distance
I see you're next to me
There's so many things I'm closer to
It's nothing new
Defining ways for things to changeAs we grow older imagine me closer
To you
This space in between us won't seperate my love
From you
From you
Was I naive for trying to believe that beauty unbound
Could be found
To simplify the ways we always tried to be around
Then I found
Through the misted all this distance
I see you're next to me
There's so many things I'm closer to
It's nothing new
Defining ways for things to changeAs we grow older imagine me closer
To you
This space in between us won't seperate my love
From you
Did you ever break?? things that you do
Identify with you
Every time you make a wave there's no disguise
As we grow older imagine me closer
To you
This space in between us won't seperate my love
From you
As we grow older imagine me closer
To you
This space in between us won't seperate my love
From you
