

Beautiful

Sevendust

200 miles per hour, that's how fast I seem to go
With the weight of the world on my shoulders
Slow down, come and catch us all Wait, slow down, take, slow down
Why can't you help me? Slow down Feel when I'm in doubt, I need something beautiful
To fill the space we've taken up
I need something to feel real again before I go numb Downward spiral a kaleidoscope view
Is what you're seeing saying so jaded
The picture I drew Come again, come again, come again
Wait, take, wait
Why can't you help me?
Wait take, wait, take Feel when I'm in doubt, I need something beautiful
To fill the space we've taken up
I need something to feel real again before I go numb Are you alive? Are you alive?
I'm alive, when I'm in doubt, I'm alive
