Escape

Brazil

Awake, dreaming, solemn revery
Too lost secret, linkin' a broken chain
Eyes are open, only they don't see
Color, shape, and terminal velocityRun away when I feel danger
Danger hides in every stranger
Stranger things have happened
So I feel like being stranger, laughingAll the right to make a world of your own
Escape overrides its
The right make a world of your own
Escape overrides itsAll is lost and all is lost on me
Lorazepam says it will set me free
No cold, no heat, feeling has passed through me
Give me one thing, escape is all I needRun away when I feel danger
Danger hides in every stranger
Stranger things have happened
So I feel like being a stranger, laughingAll, the right to make a world of your own
Escape overrides its all
The right make a world of your own
Escape overrides itsBreathing down my neck you see
Is someone else's destiny
It makes no difference to pretend
So give me all my garmonboziaPlease give me one thing
Please give me one thingAll, the right make a world of your own
Escape overrides its all
The right make a world of your own
Escape overrides its
