

# I'm Not Ready

## CHAPPO

I'm not ready but here I go  
Tell my baby it's not her fault  
She's long passed but that's your job  
Rack your brain and travel back  
You're living so fast and that's a luxury  
You're living so fast it's a thought you never think  
I'm living in the past cause I move so slow  
And I didn't know, but why? You and I have got to try something  
You and I have got to try, try  
Tell this man to turn that off  
Well I'm not ready to move at all  
I've got a little bitty notion to blow it off  
I'm in a penitentiary that's posing as another thing  
It's brave to save our little world  
We're living in a fantasy  
Easy turn that knob around and push that lever back again  
She's long past cause we move so slow  
And I didn't know, but why? You and I have got to try something  
You and I have come so far  
You and I have got to try, try I'm not ready but that's your fault  
You weren't ready to move at all  
I'm not ready to make that call  
You're not ready to own it all  
You and I have got to try something  
You and I have come so far  
You and I have got to try something  
You and I have got to try, try
