It Saved Me

Takida

Why did you break me?
Tell me how could you do that?
That life wasn't mine
When I screamed out load you were brought down
Then you fell hard with your soul to the groundI walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at lastNo more sad tears
I have it here
The flame that keeps everything in the clearI walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at lastEvil breathes into terror
The soud trust relemts to fear
Wake up and fight the demons
Find the strength from anywhereI walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last
