

It Saved Me

[Takida](#)

Why did you break me?
Tell me how could you do that?
That life wasn't mine
When I screamed out loud you were brought down
Then you fell hard with your soul to the ground I walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last No more sad tears
I have it here
The flame that keeps everything in the clear I walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last Evil breathes into terror
The sound trust releases to fear
Wake up and fight the demons
Find the strength from anywhere I walked away from the hole, it saved me
You sent me out in the cold but I saved me
I left my baiter alone, it saved me
Done with failure, I found my home at last
