

# Diamond Jigsaw (The Invisible's Instrumental)

## Underworld

And does it hurt  
That you finally found yourself  
And does it hurt  
That you find a bit of wealth  
Black coffee for my mood  
Can you make me shine  
Lonely sweet stuff  
Come walking  
Nick of time  
Don't look at me like a tourist  
The dog's got teeth  
All the signs are loaded  
All the signs are loaded  
All the signs are loaded And does it help  
That you finally found yourself  
And does it help  
That you crawled out of your shell  
I wake in a better place  
Let me in your head  
Blow your horn in the dark  
There's someone there  
And there's a white stretch limo parked on  
A single line  
Premium tequila  
Diamond jigsaw  
Makes me feel fine And does it help  
That you finally found yourself  
And does it help  
That you crawled out of your shell  
I wake in a better place  
Let me in your head  
Blow your horn in the dark  
There's someone there And does it help  
That you finally found yourself  
And does it help  
That you crawled out of your shell  
I wake in a better place  
Let me in your head  
Blow your horn in the dark

There's someone there  
And there's a white stretch limo parked on  
A single line  
Premium tequila  
Diamond jigsaw  
Makes me feel fine
