

In Orbit

Emanative

All that I'm seeing around me
Bright shining stars that abound me
 Suddenly out of control
 Rather it catches my soul
 Don't know what's up or down
 Somehow I feel like the clown
 Maybe someday I will wake up
To find that it's all really made up
 Going in orbit with you
 Oh yeah, that's all that I do
 Going around to the light side

Going around to the dark side
 Behind me a gray big nothing
I think that we really had something
 I don't have to fear a black hole
 Out here I'm sure of my role
 All that I am is weightless
 All that I see is timeless
 Going in orbit with you
 Oh yeah, that's all that I do
 Going around and around
 I'm going in orbit with you
