

# Fade Away

## TV Eyes

There's something different about your eyes

A change of focus  
an element of surprise  
What have they shown you?  
What did you take away?

Now you don't hesitate  
You're moving faster  
than anyone around  
Navigating disaster  
with that stuff you found  
You want my opinion  
You leave 'em wanting more  
Of course you knew that before

There's a place we can go  
in the back of our mind  
That we keep well intact  
and the sun still shines  
There may come a day  
we want a place we can hide  
We can lock all the doors  
and we can stay inside  
When we need a little speed  
we can go for a ride  
Crucial three get in free  
every single time

And we won't fade away  
Die young, stay pretty  
So the saying goes  
That has its appeal  
and everybody knows

In pursuit of commerce  
they took a piece of me and you  
Well, it might be true

There's a place we can go  
in the back of our mind

That we keep well intact  
and the sun still shines  
There may come a day  
we want a place we can hide  
We can lock all the doors  
and we can stay inside  
When we need a little speed  
we can go for a ride  
Crucial three get in free  
every single time

And we won't fade away  
No, we won't fade away

There's a place we can go  
in the back of our mind  
That we keep well intact  
and the sun still shines  
There may come a day  
we want a place we can hide  
We can lock all the doors  
and we can stay inside  
When we need a little speed  
we can go for a ride  
Crucial three get in free  
every single time

And we won't fade away  
No, we won't fade away  
We will not fade
