Because Of You

Alpheus

I'll never forget what you've done for me
When I think of the past few years
And what I went through
I know I couldn't have done it without you
(Because of you)
I'm a new man, baby, I'm a new man
Because of you
Because of you
Feeling feelings that I never knew
That's because of the fact
That I'm so in love with you
Feels like I'm flyin' but I'm walkin' on the ground
That's because I'm so high
And I'm never comin' down
And to think that just a year ago
I was so strung out and all alone
I never felt so low
Now I got the world in the palm of my hand
And it's all because of you
I turned around my life because of you
I think of all the things that you do
I turned around my life because of you
(Because of you)
Yeah, [Incomprehensible] to let you know
Never believed in miracles
Till you opened up my eyes
Now I know just how it feels
Ooh, you know you're right on time
I'm so crazy 'bout your love
Yeah, you blow my mind
My life is like a resurrection
Talk about your love
We're talkin' pure perfection
Now I got the world in the palm of my hand
And it's all because of you
I turned around my life because of you
I think of all the things that you do
I turned around my life because of you
(Because of you)

Because of you
Because of you
I turned around my life because of you
Every little thing you do
I think of all the things that you do
I turned around my life because of you
(Because of you)
Yeah, [Incomprehensible] to let you know
Every little thing you do
Every little thing you do
Every little thing you do
I turn around my life
Every little thing you do
Every little thing you do
Every little thing you do
I turn around my life because of you
You turn me up, you make me high
When I feel your love, I wanna fly
No matter what we're going through
There ain't nothing we can't do
You turn me up, you make me high
When I feel your love, I wanna fly
Now I know that dreams come true
Because of you
You turn me up, you make me high
When I feel your love, I wanna fly
No matter what we're going through
There ain't nothing we can't do
You turn me up, you make me high
When I feel your love, I wanna fly
Now I know that dreams come true
Because of you
Because of you
I turn around my life because of you
Every little thing you do, every little thing you do
Every little thing you do, every little thing you do
Because of you, yeah
You turn me up, you make me high
When I feel your love, I wanna fly
No matter what we're going through
There ain't nothing we can't do
Now I know that dreams come true
