Fire

Downset

It's immoral to encourage others
To accept injustice you do not endure
Such superficial optimism
A deepness not so pureAnesthetic presence
With an undefined concern
With images so glorified
But still where is our cure?Give, give, give
Where's your fire?
Give, give, give
Where's your fire?Movements definition unclear
Amid definite crises
Retreating carelessly with persuasions
That seem to never endAnd must immorality become
So monumental before we see?Give, give, give
Where's your fire?
Give, give, give
Where's your fire?Give, give, give
Where's your fire?
Give, give, give
Where's your fire?Out my face, out my face
Pseudo-intellectual moderate steppin' to dis
And you say that my concerns don't burn with validity
Trying to check me, got nothing to prove beOn with the privilege shit-talking
Blood of my people you're mocking
[Incomprehensible] ass running
Say full belly-buster, you're willing to suffer
And put yourself on the line and fool help me get mineGive, give, give
Where's your fire?
Give, give, give
Where's your fire?Give, give, give
Where's your fire?
