

Time On Our Side

Francis

Today, when I was cleaning the couch
Guess what I found?
Hairs from when you were younger
I know it's yours it was yours

Cos I could feel you stroking my skin
Feel your breath from within

It's funny what you leave behind
Things you're not supposed to leave behind

But I could feel you stroking my skin
Feel your breath from within
Heartbeats, yeah we were kin
We were holding all that I've ever been

And we would watch all the gardens with time on our side
Slide down the railings like the kids we were inside and
No-one had to pardon and no-one had to grieve
We would walk forever on our easy street

You were not supposed to leave your hairs on my couch and you're
Not supposed to take all the air from my mouth
I was not supposed to be the last one to go
I remember it was not supposed to be so...

But I could feel you stroking my skin
Feel your breath from within
Heartbeats, yeah we were kin
We were holding all that I've ever been

And we would watch all the gardens with time on our side
Slide down the railings like the kids we were inside and
No-one had to pardon and no-one had to grieve
We would walk forever on our easy street

Deep down I knew this would happen to us
'Cos death is what happens to everyone
Deep down I knew this would happen to us

'Cos death is what happens to everyone

But I said we would conquer it..
And we would watch all the gardens with time on our side
Slide down the railings like the kids we were inside and
No-one had to pardon and no-one had to grieve
We would walk forever on our easy street
