

# Come On

Lucinda Williams

Dear, I'm so over you  
You don't even have a clue  
All you do is make me blue  
You didn't even mate me, come on You're so self involved  
You're in some kind of fog  
You hung up on your hog  
You didn't even mate me, come on You think you're in hot demand  
But you don't know where you put your hand  
Let me tell you where you stand  
You didn't even mate me, come on Dude you're so fired  
Shut up, I'm not inspired  
All I'm feeling now is tired  
You didn't even mate me, come on You weren't even worth it  
I'm sorry I ever flirted  
The effort wasn't you to concert it  
You didn't even mate me, come on I just talk the talk  
You can't back it up with you walk  
You can't light my fire, so fuck off  
You didn't even mate me, come on
