# Mosquito

## Tareq

You like when we go fast
So my foot's on the brake, used to be my girl
But now you're just my worst mistake
You don't see it, not a subtle change
Makes me laugh, you turned into a cliche
Every time you told me
That we'd never say goodbye, was a lie
You knew what to expect from me
Just like a hit of ecstasy
You made me high
You think I still want you
After all you put me through
You think I can't walk away
And find someone better for me
Just take your overactive ego
Shrink it down like a mosquito
Baby, lovin' you was such a chore 'til I got bored

Now I don't think about you anymore
From the first time I saw you naked
I could see the future
I knew that my world was shaken
Lost my innocence then I lost my mind
Thank God now I see
'Cause with you I must have been blind 'cause
Every time you told me
That we'd never say goodbye, was a lie
Just like a common criminal
You gave me just the minimal to
Keep me hanging on inside
Now that I can breathe, I'm done with therapy
It's your turn to burn, covered up in lies
And still so full of pride, I hope you choke
'Cause it's the sex I'll miss the most
