

Her Sky

Before the Daybreak

She said she has a fire inside
Please don't leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see

I can feel her love
Every second I'm awake I can feel her pain
And I need her love
To get me through the day even if its pouring rain
Every second

She said she has a fire inside
Please don't leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see

I can see her now
Holding onto me desire running free
Every second

She said she has a fire inside
Please don't leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see

I want her to burn out with me
Into the night and heart to heart

She said she has a fire inside
Please don't leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see

She said she has a fire inside
Please don't leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see

Whoa her eyes are the only stars I see

Whoa her eyes are the only stars I see

She said she has a fire inside
Please donâ€™t leave me alone
Up and down the sky has fallen
Her eyes are the only stars I see
