

Future Boys

Electric Six

Bobby goes to work on Mondays
He's got a car but he don't drive
Billy meets him at the office
Neither one knows he's alive Tommy's closing a big deal
And he's running late for squash
Mikey's talking on the cellphone
His confidence is never lost Here come the future boys
(Future boys)
Making money, oh my God Looking so good you want to eat them
Watching how future women treat them
No weapon on earth could ever defeat them Here you see the creature in his natural habitat
Can't take away his money
'Cause he's got too much of that
Future boys, we'll be future boys Stevie's joined the corporation
Another boy for the beehive
Johnny makes love to a dummy
Says, "Ain't it good to be alive"
