Just Chill

Salman Khan

[C H O R U S]so tired , So sick of your shit , it's over (its over). Everytime i turn around you right over my shoulder (right over my shoulder). I can't live with you all up in my grill (my grill). I wish that you could just chill.
So tired , So sick of your shit , it's over (its over). Everytime i turn around you right over my shoulder (right over my shoulder). I can't live with you all up in my grill (my grill). I don't uncerstand , I wish that you could just chill.

[B R E A K D O W N - Jon Young]No matter what i do its never good enough for you. I keep on tryna please you but i dont need you. If you gone be triping everytime i see you.
[V E R S E 1 - Jon Young]Im sick and tired of all the questions its getting a bit much. Every button that i touch set's you off and then i'm fucked. Cause no matter what i do or what i say i'm always wrong. If i call, then i'm calling too much or not at all. Either way i'm messing up. I'm fighting a loosing battle. The winners been determined so im funna put down my paddle. Cause im sick of always playing this game it's getting old. Girl you know i aon't cheating you just wanna be in control. But i can't be having that cause im a grinda and you know this. You need to just chill , Consider this your final notice. I got thangs to do. Deal with it or girl im done. So if you trip over some shit again you funna be solo. My funds low so i gotta get back on my grind. No more givin' in when you trippin' i'm waisting time. You know i ain't funna do you wrong thats why im saying chill. With me you always know the deal. Girl i always keep it real.

[V E R S E 2 - J Cash]Just got in the door and there you was waiting. But not to greet me just to start with your interrogating. Where you been !? i told you i was with my friends. Oh my god , here we go with this shit again. I ain't gotta pruff myself i been did that. I done got you everything you need and then that. So i ain't answer my phone and now you all mad at me. Think im cheating when you see i got a low battery. It's like you feed on drama and i dont't need that. Always ova my shoulder so i'ma leave that. You need to understand and i don't think i'm wrong that once in a while i need some myspace like dot com. The same goes for the fellas. You need to trust your lady. Just hold on losely , Clingin' too tight gonna drive her crazy. But i done found a good one and damn she keep it real. You having problems, talk about it, Tell them just chill.
